

**Biography**

MP-X301 worked for the Xenon Planetary Medical Center since his construction as a Medic/Pilot of the Space Ambulance. He was forcibly removed from service when, after using a bad batch of gear oil, he wrecked the ambulance into the side of the Xenonian Ambassador's personal space yacht. He is now moving from job to job, mostly scut work. Lately, he's picked up a berth on an impressive luxury cruise liner in the medical bay... cleaning medicine cabinets and bed pans.

Warranty: 10 years, expired.
